

## **TOPS Hires Research & Development Engineer – Traffic Operations Microsimulation**

6 July 2006

The TOPS Lab has hired Chanyoung Lee, Ph.D., as a Research and Development Engineer – Traffic Operations Microsimulation. Dr. Lee will be conducting microsimulation modeling, cost/benefit analysis, geospatial analysis, and simplified sketch analysis for the Southeast Freeways program in order to provide information about project alternatives. Additional responsibilities will include developing Environmental Impact Statements, performing preliminary engineering, generating Design Study Reports, and overseeing final engineering and construction.
