# Release Notes

---

v4.1.2

May 2011

## New Features

---

SpatialOFFLINE 4.1.2 provides compatibility to multiple versions of spatialNET, which enables users of SpatialOFFLINE to continue to take advantage of software enhancements and fixes without having to upgrade spatialNET.

## Backward and Forward Compatibility

SpatialOFFLINE 4.1.2 is compatible with the previous spatialNET release, 5.6, the current release, 5.7, and the beta version of the next release, 5.8.

## Technical Notes

---

SpatialOFFLINE 4.1.2 is compatible with spatialNET 5.6 and 5.7

A new 4.\* compatible license key is required for spatialOFFLINE 4.0.1 and beyond.

## Completed Modifications

---

### **DE7559 Improve export performance**

Improved performance of exports when a subset of regions is selected by restricting the fiber portion of the export to just the selected region(s).

### **US6767 Unit of Measure (UOM)**

The OTDR Trace functionality now uses the default UOM set in the spatialNET database for displaying the selection window and in the OTDR calculation.
